

Field Experience In-process Log

- All students are required to submit a completed field experience log.
- Add rows to the table as necessary to accommodate the work you have completed.
- Keep track of your project hours as you go.
- Keep all of your evidence (pictures, interview, self-paced course, video documentation, etc.) together and be prepared to share it when required.
- Keep to the rule of ONE LINE PER DAY: Do not bundle work from multiple days together into one line on the table.
- Include enough detail in your description that I can easily imagine the work taking the indicated length of time. Each entry should include the learning that is taking place.
- Focus your descriptions on *your* work, *your* efforts, *your* observations.

WORK LOG TABLE (you can copy/paste this to set up your own table)

Date	Time Spent	Description of what you did:	Resources used/people involved:	Commentary (What did you learn, how did this advance your knowledge):
